EDUCATION

FLORIDA STATE UNIVERSITY PhD in Computational Science
Aug 2018 | Tallahassee, FL • Cum. GPA: 3.969/4.0 • Advisor: Dr. Anke Meyer-Baese

FLORIDA STATE UNIVERSITY MSc in Computational Science
Dec 2017 | Tallahassee, FL • Cum. GPA: 3.969/4.0 • Advisor: Dr. Anke Meyer-Baese

UNIVERSITY OF AKRON MSc in Physics
Aug 2015 | Akron, OH • Cum. GPA: 3.982/4.0 • Advisor: Dr. Alper Buldum

UNIVERSITY OF TEHRAN BSc in Physics
July 2010 | Tehran, Iran • Cum. GPA: 3.1/4.0 • Advisor: Dr. Hamidreza Moshfegh

WORKING EXPERIENCE: INDUSTRY

RIVIAN & VOLKSWAGEN GROUP TECHNOLOGIES | Staff Software Engineer
November 2024 – Present | Palo Alto, CA (Remote)

- Led the rollout of ConvoHealth, the observability stack for Rivian Voice Assistant, scoring all in-cabin LLM calls via LLM-as-a-judge; scaled the assistant from 3.5K to 85K, then 150K vehicles.
- Drove Databricks Asset Bundles (DABs) adoption across Rivian and RV-Tech with 10+ cookiecutter templates and platform best practices spanning MLflow, Model Serving, and the broader Databricks stack.
- Designed data-ai-hub, a Python/Terraform monorepo for libraries, apps, and services on the Databricks platform (200+ MAU), with leaf-based CI/CD across GitLab workflows and in-house toolchains for linting, formatting, type checking, and unit/integration tests.
- Built shared Python libraries (logging, Databricks, MLflow, PySpark) that standardized engineering practices across 10K+ users.
- Tools: Python, Terraform, Databricks, Asset Bundles, cookiecutter, MLflow, Model Serving, Git, GitLab, observability tooling (Datadog / Grafana / Dynatrace), LLMs.

RIVIAN AUTOMOTIVE | Staff Data Scientist – Algorithms
September 2021 – November 2024 | Palo Alto, CA (Remote)

- Stood up AI/ML platform architecture powered by ZenML, Kubeflow, and MLflow across Enterprise Technology (ET) and Digital Manufacturing Engineering (DME), including factory data systems, reusable production ML patterns, and an automated shop decision-making platform.
- Productionized Process-Health, an anomaly-detection and statistical process control (SPC) system for non-stationary processes in Rivian's battery and drive-unit shops, with Slack-bot, PagerDuty, and email alerting to identify impacted parts and vehicles during containments.
- Authored an ETL pattern with ZenML and Snowpark UDFs to transform test-results data from factory testing stations whose complex formats could not be handled by dbt ELT.
- Delivered the LineConfig application during ramp-up of the Enduro drive-unit shop.
- Deployed Battery Submodule Thermography, an on-edge Physical AI model to detect anomalous laser welds on Rivian's battery submodule line.
- Maintained the Factory-Data GitLab Cloud repository of applications, templates, features, projects, and services; developed 10+ internal Python libraries and wrappers, rolled out coding standards across Digital Manufacturing Engineering, and automated formatting, linting, testing, documentation, plus CI templates for lint, test, build, publish, and deploy of libraries, apps, Docker images, and docs.
- Tools: Python, ZenML, Kubeflow, MLflow, Snowpark, dbt, SQL, Pandas, Scikit-Learn, Slack, PagerDuty, Git, GitLab, Docker.

EXXONMOBIL CORPORATION | Senior Data Scientist
January 2020 – September 2021 | Houston, TX

- Owned the Attrition model for the Polyethylene (PE) sector of EMCC, forecasting customer churn with statistical significance to inform new-contract negotiations during COVID-era demand shocks.
- Introduced Dynamic Revenue Management (DRM), an interpretable Rules-Based pricing model for High Density Polyethylene (HDPE) and Linear Low Density Polyethylene (LLDPE) that segmented customers and recommended monthly prices to maximize variable margin for CANUSA (Canada and USA)—$90M revenue impact.
- Constructed an interpretable Transaction-Specific-Pricing model for the Polypropylene (PP) sector across the Americas (Canada, USA, and Mexico), using clustering and machine learning for customer segmentation and monthly margin-maximizing price recommendations.
- Supervised junior data scientists supporting the HDPE/LLDPE Rules-Based and PP Transaction-Specific-Pricing models, contributing $41M in additional revenue in H1 2021.
- Tools: Python, SQL, Pandas, Scikit-Learn, XGBoost, GLM-Net, TensorFlow, Keras, Azure DevOps, Git, GitHub.

ORACLE (FORMERLY CERNER CORPORATION) | Data Scientist
October 2018 – December 2019 | Kansas City, MO

- Shipped a Bundled Payments for Care Improvement Advanced (BPCI-A) model for NaviHealth covering 32 Centers for Medicare and Medicaid Services (CMS)-defined episodes of care; providers prospectively agree to a predefined reimbursement amount, improving cost transparency for patients and reducing waste for health systems.
- Created 30-day pediatric all-cause readmission models for Adventist Health, Children's Hospital of Orange County, Intermountain Healthcare, Memorial Hermann, MU Health Care, CoxHealth, BayCare Health System, Baptist Health South Florida, Atrium Health, and Advocate Physician Partners.
- Implemented a 90-day pediatric asthma readmission model for Children's Hospital of Orange County (CHOC).
- Tools: Python, Spark, SQL, MLlib, Pandas, Scikit-Learn, XGBoost, GLM-Net, TensorFlow, Keras, AWS, JIRA, Git, GitHub.

MYNOMX INC. (ACQUIRED BY 1HEALTH.IO) | Data Scientist
June 2017 – August 2017, May 2018 – August 2018 | Palo Alto, CA

- Applied statistical methods and novel algorithms to healthcare databases (Stanford and UK Biobank) for risk-assessment and population-health applications.
- Engineered datasets and pipelines to support operational and exploratory analysis.
- Translated statistical models into scalable, robust code on Spark and MLlib to handle large-volume healthcare data.
- Tools: Python, R, Spark, Scikit-Learn, Cox Regression, TensorFlow, Keras, Lifelines, MLlib, BitBucket, JIRA, Apache Zeppelin.

WORKING EXPERIENCE: ACADEMIC

FLORIDA STATE UNIVERSITY | Graduate Teaching Assistant
August 2015 – May 2018 | Tallahassee, FL

- Developed an under-graduate level course in High Performance Computing including OpenMP, MPI, CUDA, and OpenACC programming.
- Working with Programs in Interdisciplinary Computing (PIC) at Florida State University as an Instructor for Spreadsheets in Business (CGS 2518).

THE UNIVERSITY OF AKRON | Graduate Teaching Assistant
August 2013 – August 2015 | Akron, OH

- Worked in Physics (I , II) LABS.
- Instructor for Physics Life Science.
- Grader for Astro-Physics & Classical Physics (I , II) .

UNIVERSITY APPOINTMENTS

DEPARTMENT OF SCIENTIFIC COMPUTING, FLORIDA STATE UNIVERSITY | Affiliated Faculty
October 2018 – Present | Tallahassee, FL

- Leading Dr. Meyer-Baese's group and directing the MS and PhD students.
- Collaborating on different projects including deep learning in medical imaging, network analysis, and machine learning.

SCHOOL OF INFORMATION, FLORIDA STATE UNIVERSITY | Adjunct Professor
August 2022 – Present | Tallahassee, FL

- Fall 2022: Data Mining and Analytics (LIS 5765)
- Summer 2023: Data Mining and Analytics (LIS 5765)
- Fall 2023: Data Mining and Analytics (LIS 5765)
- Fall 2023: Data Mining and Analytics (LIS 4761)
- Summer 2024: Data Mining and Analytics (LIS 5765)

EDITORIAL BOARD

JOURNAL OF FRONTIERS IN NEUROINFORMATICS | Associate Editor
August 2021 – Present

RESEARCH

FLORIDA STATE UNIVERSITY August 2015 – August 2018 | Tallahassee, FL
Working on a Data Mining Project under supervision of Dr. Anke Meyer-Baese to apply Machine Learning algorithms on fMRI and MRI data. I am also working on Deep Learning algorithms to build predictive models for various databases in collaboration on several fields including neuro-imaging, breast cancer, dementia, energy consumption, stock market, ground motion modeling, airfoil noise, distance-learning, and engineering problems.

THE UNIVERSITY OF AKRON August 2013 – August 2015 | Akron, OH
Worked with Dr. Alper Buldum for two years. My Thesis topic was Fluid Flow Through Carbon Nanotubes & Graphene Based Nanostructures. We implemented a Molecular Dynamics code written in Fortran for three different models, containing Single-Walled Carbon Nanotubes, Graphene Wall as structures, and Liquid Argon as flow of the system. The application of that would be found in the field of Drug Delivery.

OPEN SOURCE LIBRARIES

Founder of SlickML (**github.com/slickml**), an open-source organization building practical MLOps and AI tools in Python. Selected libraries:

SLICKML SlickML is an open-source machine learning library aimed at accelerating experimentation for ML applications. It provides a toolbox of utilities for repetitive workflows such as feature selection, model tuning, and classification/regression metrics evaluation, so practitioners can prototype solutions with minimal code. GitHub: **github.com/slickml/slick-ml** ; docs: **docs.slickml.com** .

SLICKTUNE SlickTune is a composable LLM fine-tuning toolkit that wraps common parameter-efficient and full fine-tuning techniques into a unified workflow for experimentation and production-oriented training. GitHub: **github.com/slickml/slick-tune** .

SLICKBET SlickBet is an open-source livescore screener for data-driven sports betting workflows. GitHub: **github.com/slickml/slick-bet** .

AFK-BOT AFK-Bot is an open-source automation bot for away-from-keyboard productivity workflows. GitHub: **github.com/slickml/afk-bot** .

AWARDS

• August	2019	Cerner Corporation Q2 All Star Award
• April	2018	Florida State University Research & Creativity Award, Amount = $1000
• March	2018	ONR Gulf of Mexico Summer School Grant, Amount = $2400
• January	2018	Nominated for SPIE Medical Imaging Best Student Paper Award
• January	2018	Florida State University Congress of Graduate Students Travel Grant, Amount = $200
• January	2018	SPIE Travel Grant, Department of Scientific Computing, Amount = $600
• July	2017	Tutorial Volunteer MVP Award, [PEARC2017]
• July	2017	Florida State University Congress of Graduate Students Travel Grant, Amount = $1400
• June	2017	[PEARC2017] Travel Grant, Google, Amount = $1400
• April	2017	SPIE Travel Grant, Department of Scientific Computing, Amount = $1200
• April	2017	Florida State University Congress of Graduate Students Travel Grant, Amount = $200
• January	2017	PhD Candidacy Exam (Score : 95.1%), Department of Scientific Computing
• July	2016	Florida State University Congress of Graduate Students Travel Grant, Amount = $200
• July	2016	1st Place in [XSEDE2016] Data Simulation & Modeling Contest
• June	2016	[XSEDE2016] Travel Grant, Texas Advanced Computing Center (TACC), Amount = $3000
• October	2015	Dean's Scholarship, Florida State University, Amount = $1000
• August	2015	Graduate Teaching Assistantship, Florida State University
• December	2014	Annual Outstanding MS Academic Achievement, The University of Akron, Amount = $500
• December	2013	Annual Outstanding MS Academic Achievement, The University of Akron, Amount = $500
• August	2013	Graduate Teaching Assistantship, The University of Akron
