SUMMARY

Staff Software Engineer building production **AI/ML platforms**, **MLOps** pipelines, and observability systems. **PhD** in Computational Science with **80+ publications** and **1700+ citations (Google Scholar)**; founder of **SlickML**, an open-source organization for MLOps and AI tools. Targeting **MLOps / AI Engineer** roles.

EXPERIENCE

RIVIAN & VOLKSWAGEN GROUP TECHNOLOGIES | STAFF SOFTWARE ENGINEER

November 2024 – Present | Palo Alto, CA (Remote)

- **Technical lead** of **ConvoHealth**, the observability framework for Rivian Voice Assistant—covering reliability, monitoring, and production AI evaluation via **LLM-as-a-judge**—scaled to **150K** Rivian vehicles.
- **Technical lead** for **Databricks** platform architecture and **Asset Bundles (DABs)**, enabling teams to ship production data and ML pipelines with **CI/CD**.

RIVIAN AUTOMOTIVE | STAFF DATA SCIENTIST, ALGORITHMS

September 2021 – November 2024 | Palo Alto, CA (Remote)

- **Technical lead** of **Process-Health**, an anomaly detection system deployed in Rivian's battery and drive-unit shops.
- **Technical lead** of **Battery Submodule Thermography**, an edge-deployed **Physical AI** model on Rivian's battery submodule line.
- Built **AI/ML platform** architecture with **ZenML**, **Kubeflow**, and **MLflow**; delivered a factory decision-making platform and data architecture for Rivian's Digital Manufacturing Engineering organization.

EXXONMOBIL CORPORATION | SENIOR DATA SCIENTIST

January 2020 – September 2021 | Houston, TX

- Led development of interpretable pricing and customer-segmentation models (PE/PP, North America) that drove **\$90M** in revenue impact in 2020 and **\$41M** in H1 2021.

ORACLE (FORMERLY CERNER CORPORATION) | DATA SCIENTIST

October 2018 – December 2019 | Kansas City, MO

- Led development of a 90-day pediatric asthma readmission model (**CHOC**) and 30-day all-cause readmission models across **17 U.S. hospitals** on **Spark/AWS**.

MYNOMX INC. (FORMERLY PRECISION WELLNESS INC.) | DATA SCIENTIST

June 2017 – August 2018 | Palo Alto, CA

- Developed hybrid ML algorithms for **population health** management using Stanford and UK Biobank datasets; scaled models with **Spark/MLlib**.

EDUCATION

FLORIDA STATE UNIVERSITY PhD, COMPUTATIONAL SCIENCE (ML) • MSc, COMPUTATIONAL SCIENCE

2015 – 2018 | Tallahassee, FL • GPA: 3.969/4.0

UNIVERSITY OF AKRON MSc, PHYSICS (COMPUTATIONAL)

2013 – 2015 | Akron, OH • GPA: 3.982/4.0

UNIVERSITY OF TEHRAN BSc, PHYSICS

2006 – 2010 | Tehran, Iran • GPA: 3.1/4.0

SKILLS

MLOps / AI: Databricks • MLflow • Ray • K8s / Kubeflow • LLMs • CI/CD • Observability
Data / Cloud: Databricks • Spark • SQL • AWS • Azure • Terraform • dbt
Engineering: Python • Go • Git / GitLab / GitHub • TDD • Bash • Linux • Docker
