SUMMARY

Software Engineer building production **AI/ML platforms**, **MLOps** pipelines, and observability systems. **PhD** in Computational Science with **80+ publications**, **2 book chapters**, and **1700+ citations** (**Google Scholar**); founder of **SlickML**, an open-source organization for MLOps and AI tools. Targeting **MLOps / AI Engineer** roles.

EXPERIENCE

TIGER ANALYTICS | Senior AI Architect
October 2026 – Present | Santa Clara, CA (Remote)
- Directed **MLOps** for **AmeriHealth** on **Databricks** and **Azure**, spanning experiment tracking, model registry, serving, and governed promotion of healthcare ML workloads.

RIVIAN & VOLKSWAGEN GROUP TECHNOLOGIES | Staff Software Engineer
November 2024 – May 2026 | Palo Alto, CA (Remote)
- Led the rollout of **ConvoHealth**, the observability stack for **Rivian Voice Assistant**, scoring all in-cabin **LLM** calls via **LLM-as-a-judge**; scaled the assistant from **3.5K** to **85K**, then **150K** vehicles.
- Drove the **Databricks** platform across Rivian and RV-Tech—**DABs**, **10+** cookiecutter templates, **data-ai-hub** (Python/Terraform, **200+** MAU, leaf-based **CI/CD**), and shared libraries used by **10K+** users.

RIVIAN AUTOMOTIVE | Staff Data Scientist, Algorithms
September 2021 – November 2024 | Palo Alto, CA (Remote)
- Stood up **AI/ML** platform architecture (**ZenML**, **Kubeflow**, **MLflow**) across ET and DME, plus the Factory-Data GitLab repository—**10+** internal libraries and CI templates for lint/test/build/publish/deploy.
- Productionized **Process-Health**—anomaly detection and **SPC** for non-stationary processes in battery and drive-unit shops—with Slack, PagerDuty, and email alerts for containments.
- Deployed factory ML including **Battery Submodule Thermography** (on-edge **Physical AI** for laser welds), **LineConfig** for the Enduro ramp, and a **ZenML**/**Snowpark UDF** ETL path for nested test-station data.

EXXONMOBIL CORPORATION | Senior Data Scientist
January 2020 – September 2021 | Houston, TX
- Owned the **PE** attrition model for **EMCC**, forecasting customer churn with statistical significance to inform contract negotiations during COVID-era demand shocks.
- Introduced **Dynamic Revenue Management (DRM)**, an interpretable rules-based pricing model for **HDPE** and **LLDPE** (CANUSA) that segmented customers and recommended monthly prices to maximize variable margin—**$90M** revenue impact.
- Constructed a transaction-specific pricing model for **PP** across the Americas, using clustering and machine learning to recommend margin-maximizing prices.
- Supervised junior data scientists on the HDPE/LLDPE and PP pricing systems, contributing **$41M** in additional revenue in H1 2021.

ORACLE (FORMERLY CERNER CORPORATION) | Data Scientist
October 2018 – December 2019 | Kansas City, MO
- Shipped a **BPCI-A** model for **NaviHealth** covering **32** CMS-defined episodes, with prospective reimbursement to improve cost transparency and reduce waste.
- Created 30-day pediatric all-cause readmission models for **10** U.S. health systems (CHOC, Intermountain, Memorial Hermann, and others) on **Spark/AWS**.
- Implemented a 90-day pediatric asthma readmission model for **CHOC**.

MYNOMX INC. (ACQUIRED BY 1HEALTH.IO) | Data Scientist
June 2017 – August 2018 | Palo Alto, CA
- Applied statistical methods and ML algorithms to Stanford and UK Biobank data for **risk assessment** and **population health** applications.
- Engineered datasets and pipelines for operational analysis, then scaled models on **Spark/MLlib** for large healthcare databases.

EDUCATION

FLORIDA STATE UNIVERSITY PhD, Computational Science (ML)
2015 – 2018 | Tallahassee, FL • GPA: 3.969/4.0

FLORIDA STATE UNIVERSITY MSc, Computational Science (ML)
2015 – 2017 | Tallahassee, FL • GPA: 4.0/4.0

UNIVERSITY OF AKRON MSc, Physics (Computational)
2013 – 2015 | Akron, OH • GPA: 3.982/4.0

UNIVERSITY OF TEHRAN BSc, Physics
2006 – 2010 | Tehran, Iran • GPA: 3.1/4.0

SKILLS

MLOps / AI: Databricks • DABs • MLflow • Model Serving • Feature Store • ZenML • K8s / Kubeflow • LLMs • RAG • LLM-as-a-judge • PEFT • PyTorch • Hugging Face • Physical AI / on-device • Ray • CI/CD • Datadog / Grafana
Data / Cloud: Databricks • Spark • SQL • AWS • Azure • Terraform • dbt
Engineering: Python • Go • Git / GitLab / GitHub • TDD • Bash • Linux • Docker
